

RYAN'S PERFUME

NAME : DANISH BASHA

RRN : 241371601008

BSC COMPUTER SCIENCE (3RD YEAR)

1. INTRODUCTION

Ryan's Perfume is a responsive luxury perfume website developed using HTML5, CSS3, JavaScript, and AngularJS. It allows users to explore perfume collections, search for fragrances, add items to a shopping cart, calculate the total price, and contact the boutique concierge. The website provides an attractive and user-friendly interface.

2. OBJECTIVES

- To develop an attractive luxury perfume shop website.
- To display artisanal fragrances and perfume items with prices.
- To implement fragrance search and shopping cart functionality.
- To calculate the total order amount dynamically.
- To create a contact form for customer feedback and inquiries.
- To demonstrate basic frontend development concepts.

3. TECHNOLOGIES USED

HTML5: Creates the structure of the webpage.
CSS3: Provides styling, colours, layouts, animations, and responsive design.
JavaScript: Implements the application's functions and logic.
AngularJS 1.8.2: Provides data binding, menu filtering, event handling, and dynamic updates.
Web Browser: Executes and displays the website.

4. KEY FEATURES

Home Page: Displays the perfume brand name, welcome message, and navigation links.
Menu Section: Displays Royal Oud, Velvet Amber, Noir Sauvage, and Rose scents with descriptions and prices.
Search Function: Helps users find perfumes and scent notes using the search box.
Shopping Cart: Allows users to add and remove items and view the selected products.
Price Calculation: Automatically calculates the total cost of selected items.
Special Offers: Displays promotional products and gift combo offers.
Contact Form: Accepts the customer's name, email, and message.
Responsive Design: Adjusts the layout for different screen sizes.

5. APPLICATION ARCHITECTURE

The application consists of three main parts:

- HTML: Defines the webpage structure and content.
- CSS: Controls the appearance and layout.
- AngularJS: Manages perfume data, cart operations, price calculation, and form interactions.

The ryanPerfumeApp module initializes the application, while the PerfumeController manages its functionality.

6. WORKING PRINCIPLE

1. The user opens the Ryan's Perfume website.
2. The user browses or searches the perfume collection.
3. The user adds products to the shopping cart.
4. The cart displays selected items and their prices.
5. The total amount is calculated automatically.
6. The user can remove items or place a demo order.
7. The user can submit a message through the contact form.

7. ADVANTAGES

- Simple and user-friendly interface.
- Easy perfume searching by name and scent notes.
- Dynamic shopping cart and price calculation.
- Attractive luxury design with hover effects.
- Responsive layout for different devices.
- Easy to maintain and modify.

8. LIMITATIONS

- No backend or database connection.
- Orders are not processed in real time.
- Online payment is unavailable.
- Cart details are not permanently stored.
- Contact messages are not sent to a real email account.

9. FUTURE ENHANCEMENTS

- Database integration.
- Customer login and registration.
- Online payment facility.
- Real-time order tracking.
- Admin dashboard for perfume collection management.
- Customer reviews and ratings.
